

RAÍZ

WEDGE & SPACER COMPONENTS

Frame: Hardwood

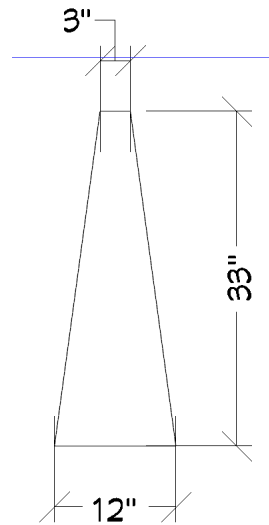

The Raíz Collection is a sculptural seating system composed of modular pieces that can stand alone or be seamlessly linked together. Each form is designed to function independently or adapt fluidly into a larger configuration—offering endless possibilities in layout and composition.

Connections can be made at both the sides and front of each module, allowing the pieces to link with other chair components, ottomans, or side tables using spacers or angled wedge connectors.
